

Thank you for joining us for the inaugural “729 Miles of Technology” conference!

This conference, the first collaborative instructional technology event to be sponsored by the Northwest Five Consortium (NW5C), seeks to bring together instructional technologists and faculty members from the five member institutions for two days of workshops, discussions, and site visits.

We hope to foster connections among faculty and staff colleagues at the five institutions and take the first steps toward cross-institutional instructional technology support, collaboration, and resource sharing. We welcome your feedback on this year’s meeting and for future events; thank you for attending.
